

AI Workflow Cost & Capacity Test

ORNL Brand Agent V2.3.2 | Test 02: heavy-duty EV graphic

Model: GPT-5.6 Sol | Mode: Instant

One run used 2% of one user's monthly allowance, allowing up to 50 comparable runs per month.

10 CREDITS PER RUN	\$0.40 DISPLAYED ESTIMATE PER RUN	2% OF 500 MONTHLY CREDITS	50 MAX RUNS PER USER PER MONTH
-----------------------	--------------------------------------	------------------------------	-----------------------------------

Monthly capacity assumes all 500 credits are available for this workflow. A 50% reserve leaves capacity for 25 full runs.

Observed result

CONCEPT GENERATED 1 Instant output supplied	The run produced a distinct visual concept. This record measures cost and capacity; no formal quality-assurance pass/fail score was supplied.
--	---

Leadership interpretation

Capacity: 10 credits per run allows up to 50 comparable runs per month - before any other credit-consuming work.	Comparison: The measured deltas were half the Sol/Light test: 10 vs. 20 credits and \$0.40 vs. \$0.80.	Use: Repeat both settings against the same quality gate before drawing a cost-per-usable-output conclusion.
--	--	---

Standard scorecard for future tests

REPORT EVERY TIME	STANDARD CALCULATION OR RULE	THIS TEST
Run boundary	One fixed task from submission through final stop, including model retries or repairs	1 measured request; 1 output supplied
Measured cost	After value minus before value; report only the delta	10 credits / \$0.40
Allowance share	Credits per run divided by 500	2%
Monthly capacity	Floor of 500 divided by credits per run	50 runs/user maximum
Output status	Result category plus agreed quality-assurance status	Concept generated / QA not scored
Elapsed time	User-visible task time	Not supplied

After repeated runs: add median credits per run, quality-assurance pass rate, and credits per usable output. Those measures are more decision-useful than a single-run dollar estimate.

Source basis: measured 10-credit and \$0.40 dashboard deltas for this run; 500-credit monthly allowance supplied by management. The dollar figure is the dashboard estimate and may not equal an incremental invoice charge. Generated output remains subject to ORNL content-owner and brand review.
