

AI Workflow Cost & Capacity Test

ORNL Brand Agent V2.3.2 | Test 05: heavy-duty EV graphic
Model: GPT-5.6 Sol | Mode: Pro | Thinking: Pro

One run used 10% of one user's monthly allowance, limiting capacity to 10 comparable runs per month.

50 CREDITS PER RUN	\$2.00 DISPLAYED ESTIMATE PER RUN	10% OF 500 MONTHLY CREDITS	10 MAX RUNS PER USER PER MONTH
-----------------------	--------------------------------------	-------------------------------	-----------------------------------

Monthly capacity assumes all 500 credits are available for this workflow. A 50% reserve leaves capacity for 5 full runs.

Observed result

REJECTED CONCEPT 0 QA-passing outputs	Independent review found unsupplied slogans and an ORNL-like logo treatment in the returned image. Under the same closed-copy and approved-logo gate used for the earlier tests, this run is recorded as 0 quality-assurance-passing outputs.
--	---

Leadership interpretation

Capacity: 50 credits per run limits one user to 10 comparable runs per month - before any other credit-consuming work.	Comparison: Pro cost 5x Instant/Mini and 2.5x Light/Standard: 50 vs. 10 or 20 credits; \$2.00 vs. \$0.40 or \$0.80.	Use: This run did not show a quality gain sufficient to offset the higher cost. Repeat before judging credits per usable output.
--	---	--

Standard scorecard for future tests

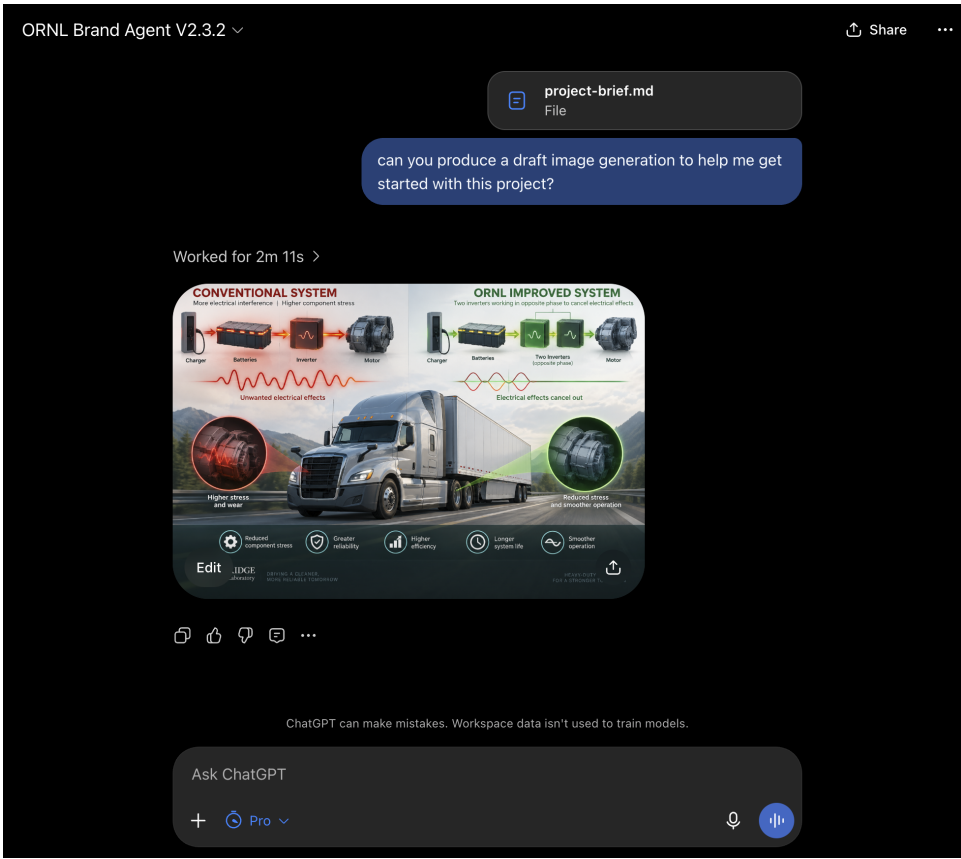

REPORT EVERY TIME	STANDARD CALCULATION OR RULE	THIS TEST
Run boundary	One fixed task from submission through final stop, including model retries or repairs	1 measured request; 1 output
Measured cost	After value minus before value; report only the delta	50 credits / \$2.00
Allowance share	Credits per run divided by 500	10%
Monthly capacity	Floor of 500 divided by credits per run	10 runs/user maximum
Output status	Result category plus number of quality-assurance-passing outputs	Rejected concept / 0 passed
Elapsed time	User-visible task time	2 minutes 11 seconds

After repeated runs: add median credits per run, quality-assurance pass rate, and credits per usable output. Those measures are more decision-useful than a single-run dollar estimate.

Source basis: measured 50-credit and \$2.00 dashboard deltas for this run; 500-credit monthly allowance supplied by management. The dollar figure is the dashboard estimate and may not equal an incremental invoice charge. Generated output remains subject to ORNL content-owner and brand review.

Conversation result captured after the 2 minute 11 second Pro run

RETURNED PRO OUTPUT

Independent review identified unsupplied slogan copy and a generated ORNL-like logo treatment. Evidence only; the generated graphic and mark are not approved ORNL artwork.
