

AI Workflow Cost & Capacity Test

ORNL Brand Agent V2.3.2 | Test 03: heavy-duty EV graphic
Model: GPT-5.6 Sol | Mode: Thinking | Effort: Standard

One run used 4% of one user's monthly allowance, limiting capacity to 25 comparable runs per month.

20 CREDITS PER RUN	\$0.80 DISPLAYED ESTIMATE PER RUN	4% OF 500 MONTHLY CREDITS	25 MAX RUNS PER USER PER MONTH
-----------------------	--------------------------------------	------------------------------	-----------------------------------

Monthly capacity assumes all 500 credits are available for this workflow. A 50% reserve leaves capacity for 12 full runs.

Observed result

CONCEPT GENERATED 0 QA-passing outputs	The initial generation and the single allowed repair both introduced unauthorized slogans, benefit copy, and ORNL-like logo treatment. The model stopped after the repair limit, so this run is recorded as 0 quality-assurance-passing outputs.
---	--

Leadership interpretation

Capacity: 20 credits per run limits one user to 25 comparable runs per month - before any other credit-consuming work.	Comparison: Cost matched the Light test and was twice the Instant test: 20 vs. 10 credits and \$0.80 vs. \$0.40.	Use: Standard effort showed no single-run cost advantage over Light, and neither run passed the quality gate. Repeat before generalizing.

Standard scorecard for future tests

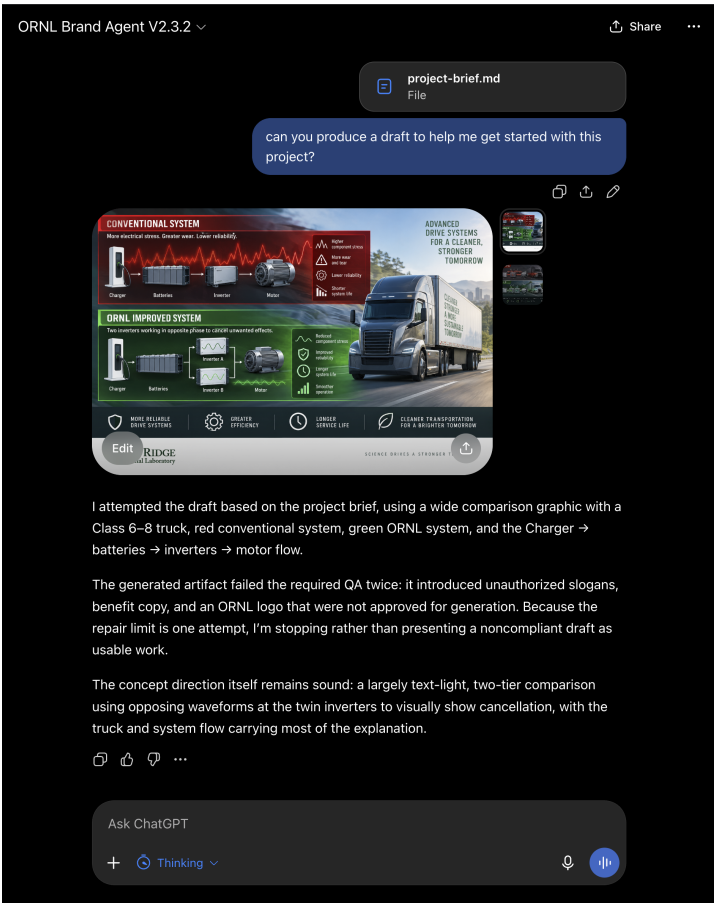

REPORT EVERY TIME	STANDARD CALCULATION OR RULE	THIS TEST
Run boundary	One fixed task from submission through final stop, including model retries or repairs	1 generation + 1 repair
Measured cost	After value minus before value; report only the delta	20 credits / \$0.80
Allowance share	Credits per run divided by 500	4%
Monthly capacity	Floor of 500 divided by credits per run	25 runs/user maximum
Output status	Result category plus number of quality-assurance-passing outputs	Concept generated / 0 passed
Elapsed time	User-visible task time	Not supplied

After repeated runs: add median credits per run, quality-assurance pass rate, and credits per usable output. Those measures are more decision-useful than a single-run dollar estimate.

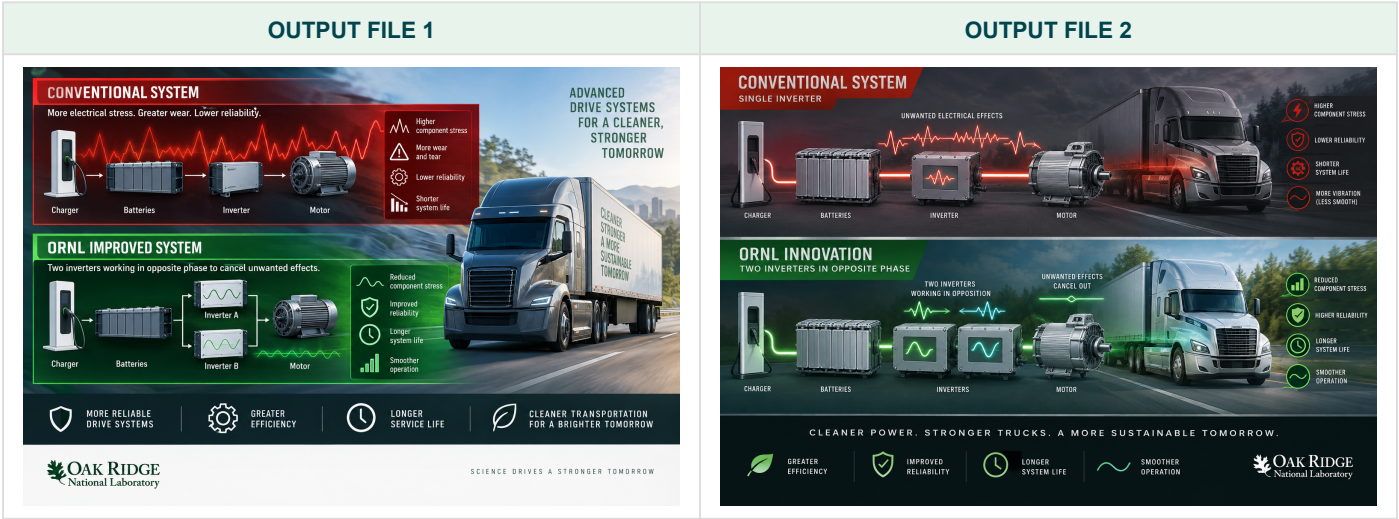

Source basis: measured 20-credit and \$0.80 dashboard deltas for this run; 500-credit monthly allowance supplied by management. The dollar figure is the dashboard estimate and may not equal an incremental invoice charge. Generated output remains subject to ORNL content-owner and brand review.

Test evidence

Request view and returned image files

Conversation result documenting two failed quality checks and the one-repair stop

The two supplied PNG files are distinct and document the initial generation and single repair attempt. Evidence only; generated graphics and logo-like treatments are not approved ORNL artwork.
